Maxim® LP™ Casement & Awning Lock

The Maxim® LP™ lock offers the same great performance as the traditional Maxim® sash lock, but features a unique low profile design by extending less than ½" into the home. The new streamlined design sports a crisp modern look while minimizing interference with window treatments.

This smooth innovative non-handed design reduces operating force by 15-20% making locking and unlocking your window even easier. The closed operating system minimizes the opportunity for air, water, light, and bug intrusion.

Substituting the traditional Maxim lock for the Maxim LP requires no tooling changes and is virtually a drop in solution. Not only will manufacturers appreciate the ease in switching locks, but homeowners will also be excited about the possibility of upgrading to a low profile solution. The Maxim LP integrates beautifully with vinyl, composite, and aluminum windows.
Maxim® LP™

Key Features & Benefits

- ✅ Contemporary styling
  - Modern aesthetics
- ✅ The lock is low profile (LP)
  - Minimal interference with window treatments
  - Minimizes appearance
- ✅ Reduced operating force
  - Smooth and easy operation
- ✅ Non-handed design
  - Minimizes inventory complexities
- ✅ Closed system
  - Minimizes air, water, light, and bug intrusion

Secure your sash with a product you trust.
